

# Peer-to-Peer: Security Risk and Liability, or Emerging Business Enabler?

Dave Piscitello, Core Competence

David Steele, Esq.

Peder Jungck, Cloudshield

Kian Saneii, Websense

Andy Salo, TippingPoint

# Agenda

- ⇒ Introduction of Panel Members
- ⇒ Peer-to-Peer...
  - Presentations
- ⇒ Directed Question & Answer
- ⇒ Questions from the Audience

## Directed Q & A

- ⇒ What are the top issues companies should consider when P2P is used in the Enterprise?
- ⇒ Is educating users about proper usage of P2P any different from any other appropriate use education? If yes, why?

## Directed Q & A

- ⇒ Why is it important to protect against P2P security threats at different policy enforcement points, including the desktop and not just at the gateway and network levels?
- ⇒ Are there different facets of P2P which need to be controlled and/or embraced and bolstered?

# Directed Q&A

- ➔ What are the practical issues organizations might face when choosing a P2P “enterprise” products
- ➔ How should a company measure acceptable risk and liability against the benefits and cost of protective controls?
