Customers Tell Us:

“Current environment is challenging

. . . . too many networks”

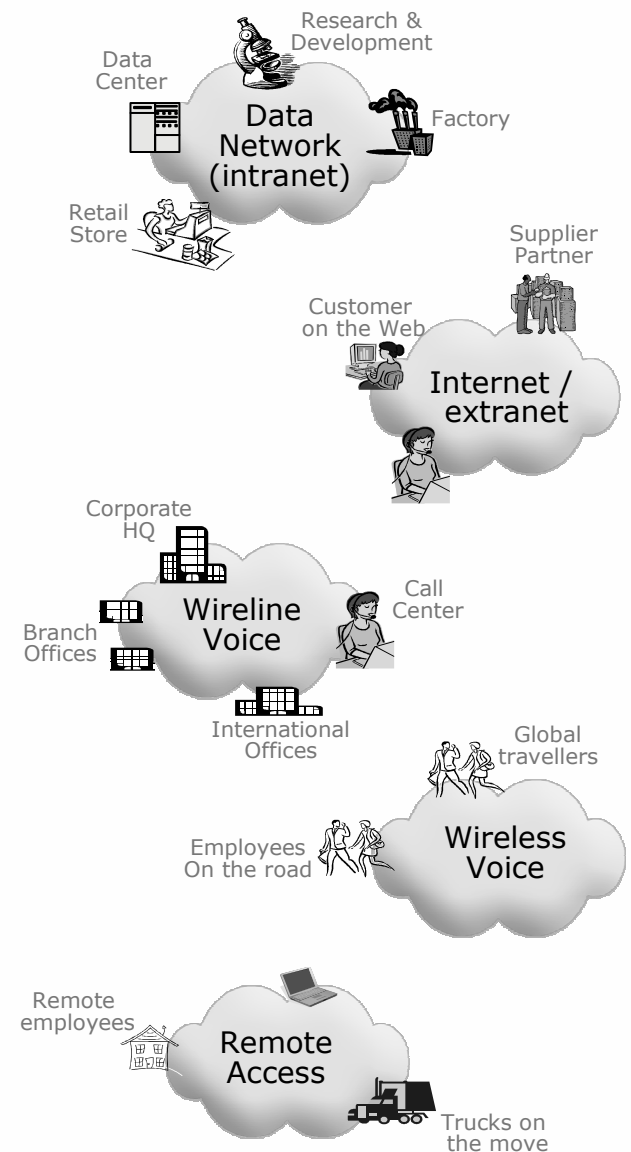

“Help me make the move to IP

. . . I know IP is where I need to be

. . . I want an all IP network that let’s me deliver applications anywhere”

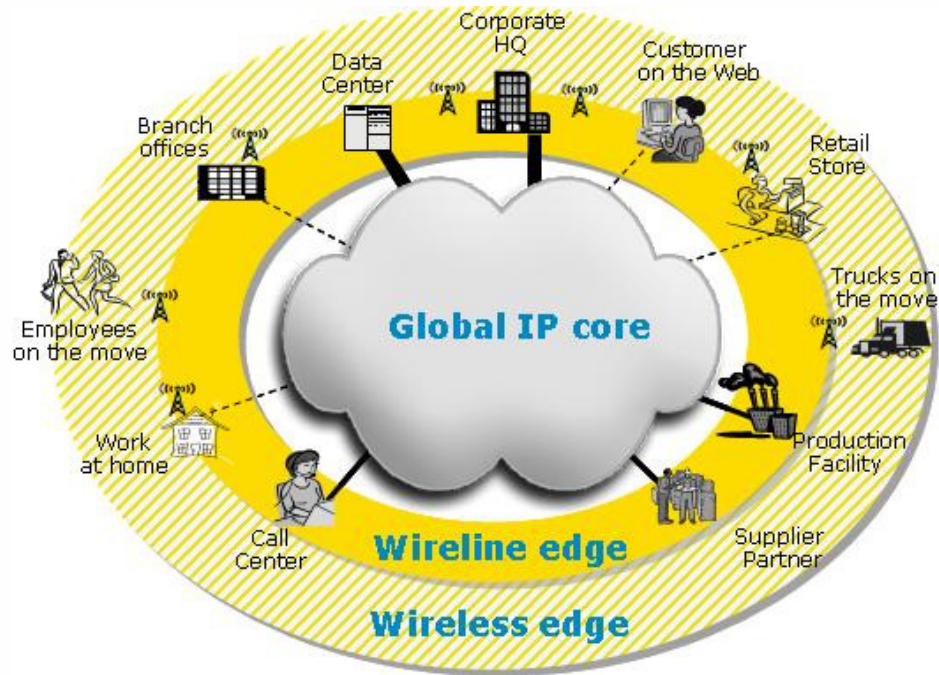

“I need to leverage mobility to compete in today’s market

. . . access to people and information wherever they are.”

Vision Of The Future

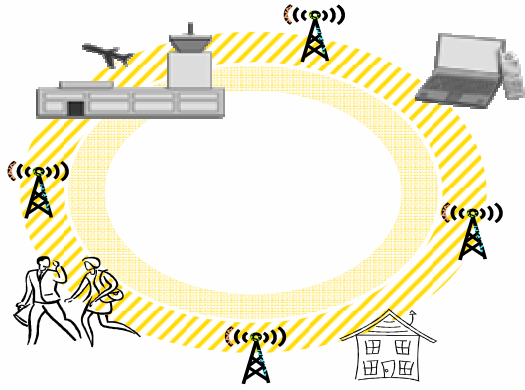

The Convergence of IP and Wireless

- > Common, flexible IP core supporting all types of business applications
- > Wireline and wireless access options to meet unique needs across the enterprise
- > Leverage key technologies
 - Global IP/MPLS
 - IMS service architecture
 - EV-DO Rev A
 - 4G WiMAX access
 - Ethernet access

The Power to Make Just About Anyplace A Workplace

The Convergence of IP and Wireless Enabling Real Business Mobility!

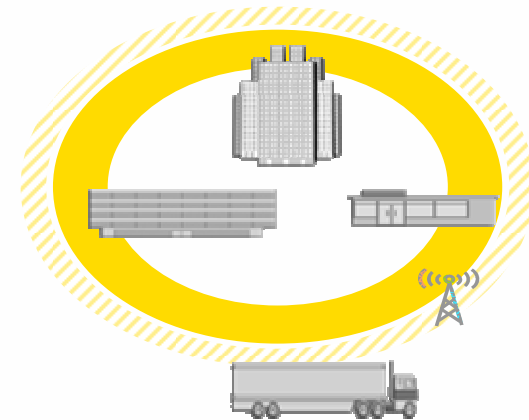

Employee Mobility

... the ability for individuals to work when and where they want to!

Enterprise Mobility

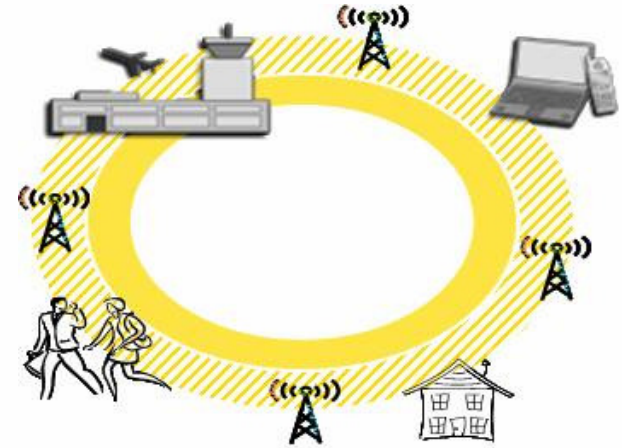

...and for businesses to respond quickly to changing business needs!

Employee Mobility

Examples

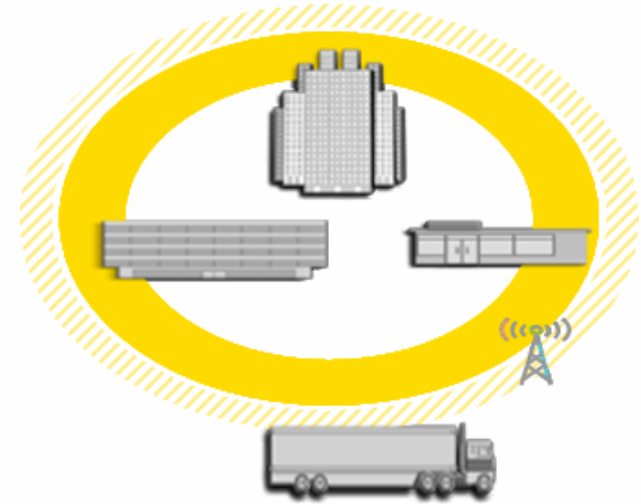

- > Provide mobile workers with desktop like access to business applications and information with Mobile Broadband & Mobile Business Applications
- > Combine or eliminate desktop phones with Wireless Voice, IP Telephony & VoIP mobile extension. Simplifies end-user experience with single feature set, voicemail and interface
- > Enable all these solutions in the field and in the office with Custom Network Coverage solutions

Enterprise Mobility

Examples

- > Simplify networks and increase survivability and reach with Global MPLS and IP Networking
- > Support new applications with bandwidth efficient IP services and flexible, predictable-cost class-of service
- > Simplify management and improve end-user experience with Hosted or Premise IP Telephony
- > Enhance business continuity with the ability to harden or quickly redeploy sites with IP and Wireless WAN access

IP and Wireless Convergence

Customer Benefits

- > **Value:** Get more bandwidth and capabilities for the same cost
- > **Flexibility:** Deploy new applications throughout your business easily with any-to-any connectivity and flexible class-of-service
- > **Survivability:** Greater survivability and disaster recovery
- > **Advanced Capabilities:**
 - Real world performance with End-to-end SLAs
 - Real "private IP" options for enhanced security
 - Multicast capabilities standard
 - Wireline and wireless access solutions for greater flexibility and survivability
- > **Future Proof:** Guarantee your investment in IP, the undisputed foundation of IT today and into the future

Thank You!
