

# INTEROP<sup>®</sup>

LAS VEGAS | MAY 20-25, 2007

BUSINESS. TECHNOLOGY.

ONE WEEK. ONE PLACE.

**Register  
for a Free  
Expo Pass**

## **DON'T MISS THE LEADING BUSINESS TECHNOLOGY EVENT**

Interop brings together IT and business leaders to see all of the latest technologies in action. Visit more than 400 exhibitors, attend dozens of free sessions and events, and check out live demos of practical business solutions. Whether you need to evaluate a technology, solve a challenge, or just stay ahead of the curve, Interop will help you move your business forward.

**Register for an Expo Pass and take advantage  
of a full calendar of free programs.**

# Attend Interop Las Vegas—the leading business technology event.

Interop is the one place to see everything that's happening in business technology today. If you're looking to boost productivity, increase knowledge and gain a competitive edge, you must attend Interop.

Come to Interop and get the big picture. [www.interop.com](http://www.interop.com)

## Interop brings together key technologies in the most comprehensive event for IT and business leaders:

- Collaboration
- Data Center
- Application Delivery
- VoIP
- Broadband Wireless
- Enterprise 2.0
- Optimization
- Fixed Mobile Convergence
- Security
- Muni Wireless
- Networking & Services
- SOA
- Storage
- Branch Office
- Unified Communications
- Virtualization
- WebOps
- Wireless & Mobility

### Who Should Attend:

- IT Professionals
- Business Managers
- Channel

### Why Attend:

- Get the big picture
- See all the latest solutions in one place
- Gain insight into the future of business technology
- Learn about key issues for your IT organization
- Share ideas and learn from peers.
- Hear from experts and leading voices in the industry
- Learn how to apply IT to solve business challenges

## INTEROP PARTY

Celebrate and network with peers the evening of Tuesday, May 22 at the Rum Jungle. Join your colleagues after show hours to relax, have fun and talk about exciting new technologies at this year's event. **The Interop attendee party is open to anyone with an educational or Expo Plus Pass.** Register with priority code MLPNNL35 at [www.interop.com/register](http://www.interop.com/register)

# Free Programs—Open to All Attendees

TUESDAY–THURSDAY, MAY 22–24

## EXPOSITION

Visit more than 400 exhibitors and check out live demos of tomorrow's business solutions. Evaluate new products and meet with leading vendors. Special areas of the show floor this year include the Security Zone, Performance Zone, Broadband Wireless World and Start Up City. (See p. 12 for details.)

## KEYNOTES

Gain insight into the future of business technology. Top executives from Avaya, Cisco, IBM Internet Security Systems, McAfee, Microsoft and Nortel will share their visions of tomorrow's IT industry. (See p. 5 for details.)

## FREE SESSIONS

Choose from dozens of free sessions, covering every IT angle.

Highlights include:

- Green to Gold: Eco-Advantage Strategies for a Changing IT World
- Carrier Ethernet for Business
- SMB Solutions Summit
- Sessions from Microsoft, Cisco, APC and other industry leaders
- **And many more...**

(See p. 6 for details.)

## INTEROPNET

Take a free tour and see solutions from multiple vendors working together in a live demonstration of leading-edge technologies. (See p. 9 for details.)

## INTEROPLABS

See the latest technologies in live test-beds, learn from the experts and explore the current state of key initiatives:

- VoIP: Wireless & Security Initiative
- Network Access Control Initiative

(See p. 10 for details.)

## BOOTH CRAWL

Tuesday, May 22

3:30–5:00 PM

Visit vendors in the Exposition to learn about the latest technologies while enjoying a refreshing beverage. (See p. 14 for details.)

## BEST OF INTEROP AWARDS

Learn about outstanding products released in the past year for every facet of your IT organization. (See p. 14 for details.)

### Register for a **FREE Expo Pass**

for full access to free programs at Interop Las Vegas.

### Upgrade to an **Expo Plus Pass** for just **\$195**.

In addition to all the benefits of the Expo Pass, you'll also gain admission to the Attendee Party at the Rum Jungle, preferred seating at Keynotes, and receive an Interop t-shirt and Conference Bag.

**Register with priority code MLPNNL35 at**

**[www.interop.com/register](http://www.interop.com/register)**

## Key Themes

Come to Interop to get the big picture. See all of the latest technologies and find practical business solutions. Key technologies at this year's event include:

### DATA CENTER

Explore exciting new developments transforming the way IT delivers services to the business.

- Optimization
- SOA
- Storage
- Virtualization

*Sponsored by:*

### VOIP & COLLABORATION

Lay the groundwork for IP networks to carry future generations of voice and other real-time traffic and ensure investment protection.

- VoIP
- Collaboration
- Enterprise 2.0
- Unified Communications

*Sponsored by:*

### INFRASTRUCTURE & SERVICES

Learn about the latest networking developments and how to leverage them to improve business continuity.

- Application Delivery
- Branch Office
- Networking & Services
- WebOps

*Sponsored by:*

### WIRELESS & MOBILITY

Extend application and data resources to mobile workers regardless of location or device and develop a sound wireless and security strategy.

- Wireless & Mobility
- Fixed Mobile Convergence
- Broadband Wireless
- Muni Wireless

*In association with:*

### SECURITY

Gain insight into key business and technology topics associated with securing your information infrastructure.

*Sponsored by:*

**SEE IT ALL IN ONE PLACE AT  
INTEROP LAS VEGAS.**

[www.interop.com](http://www.interop.com)

## Keynotes—Open to all Attendees

Gain insight into the future of business technology from visionary, industry leaders.

**John Chambers**  
*Chairman and  
CEO*  
Cisco Systems

**Louis J. D'Ambrosio**  
*President and CEO*  
Avaya

**Dave DeWalt**  
*CEO and President*  
McAfee, Inc.

**Bob Muglia**  
*Senior Vice President*  
Microsoft Server and  
Tools Business

**Thomas E. Noonan**  
*General Manager*  
IBM Internet Security  
Systems

**Mike S. Zafirovski**  
*President and  
CEO*  
Nortel

## Special Events—Open to All Attendees

### **BEST OF INTEROP**

#### **Network Computing**

A panel of expert judges from *Network Computing* will announce notable products released in the past year. Awards will be presented to products that advance the state of distributed computing and networking in the following categories:

- Application Networks & Performance
- Data Center & Storage
- Infrastructure
- Management, Network Software & Services
- Security
- VoIP & Collaboration
- Wireless & Mobility

Two special awards will also be announced during the awards ceremony:

- Best Start Up Product
- Best of Interop

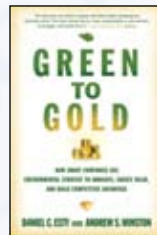

### **INTEROP BOOTH CRAWL**

**Tues., May 22, 3:30-5:00 PM**

Quench your thirst with vendor-hosted beer, wine and cocktails. Visit vendor booths to learn about the latest technologies while enjoying a refreshing beverage.

### **Green to Gold: Eco-Advantage Strategies for a Changing IT World**

**Wed., May 23, 10:30 AM-12:30 PM**

Climate change, an increasingly stringent regulatory environment and added stakeholder pressures are driving tech buyers to go green. Come hear "Green to Gold" author Andrew Winston and a panel of peers

discuss what's driving this sea change, and how smart companies are changing strategies in response.

*Sponsored by: Sustainable Life Media*

## Free Sessions—Open to All Attendees

### Making it “Real” in the Data Center: How RTI Increases Flexibility and Reduces Costs

**Tues., May 22, 11:15 AM–12:00 PM**

A recent survey conducted by *CIO Magazine* showed that more than 55% of CIO's rated their physical infrastructure as a high priority in deploying Real-Time Infrastructure (RTI). Learn how a flexible, scalable, modular physical infrastructure can enable RTI by offering the benefits of agility, TCO savings and increased availability.

Sponsored by:  **APC**  
Legendary Reliability™

### Proactively Defending the Network with Security Information and Event Management

**Tues., May 22, 12:15–1:00 PM**

Security information and event management's role in the network has historically been forensic in nature. Learn how you can use this technology to proactively monitor and defend your network. Watch a live demonstration where you will see how to use SIEM to catch insider abuse, stop an external attack, prevent data loss via USB and kill inappropriate behavior on your network.

Sponsored by:  **TriGeo**  
Network Security

### Carrier Ethernet for Business

**Tues., May 22, 2:00–4:30 PM**

In this special program hosted by the Metro Ethernet Forum you'll get the latest information on the increasing availability of regional, national and international Ethernet Services, plus actual case-study implementations supporting mission critical business applications. Topics include service provider/user perspectives, business benefits, access technologies and certification.

Sponsored by:  **MEF**  
MetroEthernetForum

### Data Center Planning Strategies to Trim Costs, Build Agility

**Tues., May 22, 2:15–3:00 PM**

Businesses of every size are faced with a common dilemma; how to achieve the greatest possible computing performance and efficiency for the least cost. High density deployments offer tremendous value, but are you achieving the value you

expect? Break from legacy processes and technologies to achieve the highest level of computing performance and operating efficiency matched to your scaling business needs.

Sponsored by:  **APC**  
Legendary Reliability™

### Application-Fluent Networks: Bridging the Application and Network Divide

**Tues., May 22, 3:15–4:00 PM**

Traditionally, application and network teams have been at odds. Lack of coordination between these IT groups can lead to poorly performing (or even failed) application deployments. Learn how application delivery networking can be leveraged to facilitate collaboration between application and networking groups, while meeting end user requirements.

Sponsored by: 

### Uncovering What's Under the Network Covers: Digging Deep into Network Traffic

**Wed., May 23, 10:15–11:00 AM**

With the proliferation of high-speed networking technologies and escalating demand for policy applications, the existing network infrastructure has become a bottleneck in high-speed communications. Learn what to evaluate when selecting an approach to deep packet inspection to ensure maximum performance and speed.

Sponsored by:  **bivio**  
NETWORKS

### WAN Optimization is Not Just About Moving Data from Point A to Point B

**Wed., May 23, 10:15–11:00 AM**

Getting applications to consistently perform over the WAN requires a sophisticated approach. Trendy data reduction techniques improve the performance of some applications, but do not guarantee performance all of the time for the all of the applications. Learn how to cut away the hype and get to the real-world application challenges, as well as proven solutions to resolve issues.

Sponsored by:  **EXPAND**  
networks

## Free Sessions—Open to All Attendees

### High Definition Video: Shaping the Future of Human Interaction

**Wed., May 23, 11:15 AM–12:00 PM**

Organizations are increasingly challenged by the need to collaborate across disparate locations, time zones and borders. As time and resources become more valuable, so does the ability to leverage effective solutions. Explore the world of high definition video communications and how it's shaping the future of human interaction.

Sponsored by:  LifeSize™

### 802.11n: Get the Facts

**Wed., May 23, 2:15–3:00 PM**

While a ratified IEEE 802.11n standard isn't expected until next year, vendors have already starting shipping "Pre-N" products causing organizations to question its impact on their wired and Wi-Fi networks. Get a technical overview of 802.11n and how its increased performance will impact your infrastructure.

Sponsored by:  XIRRUS  
Enterprise Triple Play Wi-Fi™

### Architecting Your Enterprise GIS

**Wed., May 23, 3:15–4:00 PM**

The evolution of Geographic Information Systems (GIS) from desktop tools to enterprise infrastructure has thrust GIS into the mainstream. As with any solution, GIS must be well architected to achieve full value. Get an overview and explore architectural choices, enterprise integration and service-oriented architecture.

Sponsored by:  ESRI

### WITI Reception

**Wed., May 23, 5:30–8:30 PM**

Join Women in Technology International to celebrate the one-year anniversary of the Las Vegas chapter with a Keynote address from Eileen Brooker, VP of North American Sales from Extreme Networks.

Sponsored by:  WITI  
women in technology international.  
build. empower. inspire.

### NPA Awards

**Thur., May 24, 12:15–1:00 PM**

The NPA award for professionalism honors individuals for outstanding achievement in the networking industry.

### SMB Solutions Summit— Open to All Attendees

**Wed., May 23**

**2:30–4:30 PM** (reception to follow)

If your ambitions are enterprise-class, but your resources are not, there's still a wealth of technologies and solutions to meet your needs. Learn how the latest trends in security, wireless and VoIP will impact your network—and help grow your business. Sessions include:

#### Protecting Your SMB Network

Every day, small and medium business networks are at the same security risk as large businesses. As security risks continue to increase worldwide, small and medium businesses face additional challenges with limited IT staff and resources. Find out how SMBs are finding ways to deploy enterprise class security solutions within SMB budget and staff limitations.

#### Optimizing Wireless LAN Deployment and Management for Growing SMB Environments

Until recently, wireless deployments in small and medium businesses consisted mainly of "fat" access points on an unmanaged network. Learn how new centrally managed solutions tailored for small and medium businesses are helping to reduce the cost and complexity of advanced wireless access and applications while still future-proofing SMB networks.

#### Innovative VoIP Technologies and Solutions Bubbling up from the SMB

VoIP is hot in the large enterprise. But where does that leave SMBs who are searching for right-size solutions that meet their particular needs for ease of use, management and scalability? Come find out how new technologies such as peer-to-peer networks and pre-configured solutions, are simplifying VoIP deployments for SMBs and VARs alike. You'll walk away from this session with a recipe for lowering your total cost of ownership with a few simple ingredients and the right mix of partners.

Sponsored by: **NETGEAR**

## Free Sessions—Open to All Attendees

### Microsoft at Interop

To address increasing complexity in the IT ecosystem, Microsoft is taking a proactive and pragmatic approach to achieving interoperability By Design. At Interop Las Vegas, Microsoft will share its approach to interoperability, demonstrating how it helps the ecosystem connect people, data and diverse systems. Microsoft's booth will showcase key products and initiatives that represent the four ways to achieve interoperability including:

- *Product Engineering with Microsoft Windows Vista Enterprise, Microsoft Visio 2007*
- *Community Engagement with Microsoft's Port 25, Open Source Lab Team and the Microsoft Network Access Protection Partner Pavilion*
- *Access to Technology with Microsoft Protocol Licensing*
- *Standards Engagement and Utilization with the Microsoft's Standards Affairs Team*

Bob Muglia, Senior Vice President, Microsoft Server and Tools Business will be a featured keynote speaker. Bob will outline Microsoft's vision of interoperability, demonstrate many exciting developments that are underway—underscoring Microsoft's commitment to interoperability and give insight into exciting future products and activities that enable this vision.

### Visualizing SQL and SQL AS Data in Visio 2007

**Tuesday, May 22, 11:15 AM–12:00 PM**

Your application deals with huge amounts of data—making sense of that information and communicating it broadly is vital to the success of your users. Learn how to incorporate dynamic views of data into your smart client application using the new data visualization capabilities in Visio2007. Stepping through the creation of an example application, topics covered will include connecting to data sources (e.g. Excel, SQL Server Analysis Service, SharePoint lists, Project and Performance Point Server), programmatically mapping that data to shapes and surfacing the data on the diagram using the Data Graphics API.

### Interoperability @ Microsoft

**Wednesday, May 23, 11:15 AM–12:00 PM**

To address increasing complexity in the IT ecosystem, Microsoft is taking a proactive and pragmatic approach to achieving interoperability By Design. Come dig into the details of Microsoft's interoperability strategy and learn more about Microsoft products and technologies that help IT Professionals more effectively connect people, data and diverse systems. Specifically, we'll discuss the new XML-based default Office file formats (Ecma Office Open XML), touch on the latest virtualization and management technologies, cover details on how Microsoft is working with the Linux and Open Source communities and discuss how Microsoft is providing access to many of their technologies to foster broad interoperability.

### Microsoft Protocols Program

**Wednesday, May 23, 12:15–1:00 PM**

Microsoft Protocols Programs make available intellectual property rights and trade secret documentation about Microsoft's proprietary client-server protocols. Partners who sign a license can implement the protocols in a broad range of server software products including non-Windows based platforms to provide services to Windows client systems. The program includes technical support, ability to view Windows source, access to Microsoft interoperability labs and inclusion in licensee events. Microsoft also is offering the chance to evaluate the documentation before taking a license. The session will focus on educating the audience about different groups of protocols, their possible implementation scenarios as well as program licensing terms and technical support options available to licensees.

# INTEROP<sup>®</sup> NET —Open to All Attendees

See firsthand how the latest solutions from multiple vendors work together in this live, collaboratively built network. Take a free tour of the InteropNet for a practical, behind the scenes look at the latest technologies.

## InteropNet Tour Schedule:

Tuesday, May 22

11:00 AM, 1:00 PM and 3:00 PM

Wednesday, May 23

11:00 AM, 1:00 PM and 3:00 PM

Thursday, May 24

11:00 AM

InteropNet providers:

Register with priority code  
MLPNNL35 at  
[www.interop.com/register](http://www.interop.com/register)

# INTEROP LABS—Open to All Attendees

See the latest technologies in live test-beds in the InteropLabs. Gain insight for today's decisions and tomorrow's plans as you watch experts develop, implement and test new solutions and attend free classes on key initiatives.

## NETWORK ACCESS CONTROL INITIATIVE

Team Lead: Karen O'Donoghue, *Lead Engineer*, US Navy

InteropLabs will explore the various NAC frameworks being developed, break down their key components and provide a status on their maturity. Learn what you can deploy today while planning for the future within your business environment.

## VOIP: WIRELESS & SECURITY INITIATIVE

Team Lead: Jim Martin, *Network Architect*

InteropLabs will demonstrate how VoIP interacts with various WLAN deployment methodologies. Gain firsthand knowledge as experts develop, implement and test current and new solutions, in a live vendor-neutral, standards-based arena.

## INTEROP LABS CLASS SCHEDULE

### Network Access Control

**Tuesday & Wednesday, May 22 & 23, 2:15–3:00 PM**  
**and Thursday, May 24, 10:15–11:00 AM**

Network Access Control allows enterprise IT managers to dynamically protect against multiple security threats including viruses, worms and spyware. This class will identify various Network Access Control frameworks being developed, clarify the key components of these frameworks and discuss the maturity and deployment of these components. Various scenarios will be defined and approaches for addressing the scenarios will be proposed. The primary goal is for attendees to gain an understanding of what they can deploy today while still planning for the technology that is coming in the future.

### InteropLabs: VoIP over Wi-Fi Considerations

**Tuesday, May 22, 3:15–4:00 PM**  
**Thursday, May 24, 11:15 AM–12:00 PM**

Learn the basics of implementing VoIP over Wi-Fi in an enterprise network. Topics covered will include: scalability, QoS, security and interoperability.

### InteropLabs: VoIP Security Considerations

**Wednesday, May 23, 3:15–4:00 PM**

Learn about some of the security issues related to deploying VoIP in an enterprise network. Topics covered will include: securing the media stream, types of attacks, attack detection and mitigation and SPIT (VoIP Spam).

# CRN Industry Hall of Fame Channel Forum at Interop Las Vegas

Sponsored by:  
**OKI**  
PRINTING SOLUTIONS

CRN has joined forces with Interop, bringing together the benefit of a tradeshow environment and smaller, more intimate, roundtables. Channel-focused attendees will have the opportunity to meet face-to-face with top vendors.

The CRN Industry Hall of Fame Channel Forum offers valuable insight into the future of the Channel in 2007, firsthand views of the latest technology solutions, partner program opportunities and hot industry trends. The CRN Industry Hall of Fame Awards Reception is the highlight of the program, where CRN will induct the next class of industry luminaries.

CRN Industry Hall of Fame Conference at Interop provides you the opportunity to meet face-to-face with top technology vendors, distributors and leading editors and focus on new opportunities within the channel. Over 100 unique VAR organizations who are experiencing exponential growth in revolutionary technologies will be represented, so come network with your peers to understand their challenges and successes.

## Tuesday, May 22

**Keynote Address by Paul Saffo**, Stanford University  
**2:15–3:15 PM**

Paul Saffo is a forecaster and strategist with over two decades experience exploring long-term technological change and its practical impact on business and society.

### Demo Rooms

**4:30–5:30 PM**

Private Sponsor Demo Rooms—Visit leading technology vendors' private demonstration suites for an exclusive opportunity to see the newest technologies that will drive your business.

### CRN Industry Hall of Fame Cocktail Reception and Awards

**5:30–7:30 PM**

CRN will induct the next class of industry luminaries at this exclusive networking awards reception.

Attendance is limited to qualified solution providers. If you are interested in attending the the CRN Industry Hall of Fame program:

- 1) Register for a Free Expo Pass at [www.interop.com](http://www.interop.com)
- 2) Apply to attend the CRN Industry Hall of Fame Forum at [www.crn.com/hofregister](http://www.crn.com/hofregister)

# Exposition—Open to All Attendees

Visit more than 400 exhibitors and check out live demonstrations of tomorrow's business solutions. Whether you need to evaluate products, solve a challenge or learn about new technologies, Interop brings it all together.

**Tuesday, May 22**

**10:00 AM–5:00 PM**

**Wednesday, May 23**

**10:00 AM–5:00 PM**

**Thursday, May 24**

**10:00 AM–3:00 PM**

THE POSSIBILITIES ARE INFINITE

## Free Sessions—Open to All Attendees

### Soft Skills Development for the Technical Professional Tuesday, May 22

Soft skills development for the technical professional is often overlooked and its importance underestimated. Like a computer system requiring both hardware and software to provide system benefits, technical professionals need hard skills and soft skills in their professional development.

#### Technical Presentation Development and Delivery Techniques

**12:15–1:00 PM**

This session provides an entertaining and informative set of practical tips and tricks that technical presenters can incorporate and addresses traps that they can fall prey to. This session focuses on a practical approach to integrating commonly used tools and improving both the presentation creation and delivery of technical topics.

#### Technical Presentation Delivery: Questions, Answers and Power Statements

**4:15–5:00 PM**

An effective presentation consists of content, context and delivery. This session focuses on the use of Questions, Answers & Power Statements as tools that help you provide added-value to your attendees. You will be able to create more interaction, more curiosity, more thinking and deliver much more learning.
