- **Advanced Device Security Feature**
  - Prevent unsigned Widgets from accessing device APIs
- **Widget Management and Development Tools**
  - PC-Mobile Widget synchronization, complete development tools

# Web 2.0 Services Support

## ○ Enhanced support for

- Next-generation Web services from operator's portal to full Internet browsing
- Dynamic contents, such as JavaScript, DOM
- Flash & Ajax
  - FLV playback and Ajax contents display, essential for full Web 2.0 services support
- Web access reliability
  - Web update framework that makes it possible to update browser functionality in already-shipped devices
